## Education

### Bachelor of Technology

Computer Science and Business Systems  
SRM Institute of Science and Technology

CGPA: **9.36**

Sept 2020 - June 2024  
Chennai, India

## Experience

### GlobalLogic | Java Full Stack Intern

May 2024 - Ongoing

- Implemented REST API calls in a **microservice** using JSON and **Postgre SQL** to optimize data extraction processes, increasing efficiency by 30% and enhancing team communication. Wrote **JUnit test cases** for backend services to ensure high code quality and reliability.
- Developed and scaled microservices alongside a team member, creating **RESTful APIs** that enabled seamless data communication for internal applications. Contributed to responsive web interfaces using **React and Material-UI**, enhancing user experience and interface consistency.
- Learnt about core Java Concepts and Google cloud for CI / CD pipeline.**

### Infosys | iOS Developer Intern

Apr 2023 - May 2023

- Developed iOS applications using **SwiftUI and Firebase**, integrating advanced features like Map Kit, Call Kit, and an emergency button for enhanced hospitality functionalities.
- Utilised **Agile** methodologies and **scrum** practices to achieve a **75% reduction** in bugs and defects, ensuring efficient project development and cross-functional collaboration.
- Mitigated risks and reported **key metrics** throughout product lifecycles, addressing stakeholder concerns and aligning project outcomes with business objectives.

## Projects

### Bloom | SwiftUI+Firebase

May 2023 - Jan 2024

- Collaborated with Infosys and Apple** on the BLOOM app, a talent-sharing platform for offline events, applying Design Thinking, market research, and user persona analysis. Developed using SwiftUI and Firebase for **responsive frontend design** and real-time data management. Used **OAuth** for login.
- Designed and implemented an event booking app specialized in pottery, painting, and niche art categories. Leveraged SwiftUI and Firebase to optimize frontend and backend integration, enhancing user interaction with intuitive **SwiftUI core animations** and streamlined booking functionalities.

### SimService| Full Stack Spring boot + React Project

May 2024

- Developed a streamlined SIM activation portal with a **React and TypeScript frontend**, incorporating **Material-UI** for a modern design.
- Implemented a Spring Boot backend leveraging **Microservices architecture** and **REST APIs** for seamless data communication, optimizing SIM card activation processes.
- Enhanced user experience with styled cards for displaying **special offers** and **achieved a 30% increase** in efficiency through optimized API calls.

## Practise Projects

[StellarRide - SwiftUI](#)

[Vibe - SwiftUI + CreateML](#)

[AlgoVista - SwiftUI](#)

## Achievements

- Amongst **top 1.5 %** students competitively selected for iOS development Bootcamp at SRM IST backed by Apple & Infosys.
- Secured **2nd Prize** at MLH MesoHacks'22 Hackathon against 1000+ participants. 🏆
- Hosted a fireside chat with a prominent YouTuber with **over 1M+ followers** with an **audience of 2K+**
- Held **Tech-Lead position** at Swift Developers club, SRM and delivered over 4 projects

## Skills

SwiftUI, UIKit, Postgre SQL, Linear, JIRA, Figma, Firebase, Docker, Java, Springboot, REST APIs, React, Typescript, Git.
